

Pre-Board Examination - 2079

Class : XII

Subject: Computer Science (4281)

Full Marks: 50

Time: 2 hrs.

Set - B

Pass Marks: 20

Candidates are required to give their answers in their own words as far as practicable. The figures in the margin indicate full marks.

Group 'A'

Multiple choice Questions

[9 × 1 = 9]

Rewrite the best alternative of each question in your answer sheet.

- Which of the following is not a function of the database?
a) Managing stored data b) Manipulating data
c) Security for stored data d) Analyzing code
- In the normal form, a composite attribute is converted to individual attributes.
a) First b) Second
c) Third d) None of the above
- command is used to display the basic TCP/IP configuration for all adapters.
a) ipconfig b) ping
c) both a and b d) None of the above
- What will be the output of the following code?

```
<?php  
$x="Kathmandu";  
$y="Nepal";  
echo $x.$y;  
? >
```

- Error
- Kathmandu Nepal
- KathmanduNepal
- Nepal Kahtmandu

5. What is the correct syntax of jQuery?

- a) action().\$(selector);
- b) \$(selector).action();
- c) (selector).\$.action();
- d) action().(selector)\$;

6. What will be the output of the following code??

```
void main( )  
{  
    int n, *p;  
    n=25;  
    p= &n;  
    *p -=5;  
    printf(“%d”, n);  
}
```

- a) 25
- b) 20
- c) Address of n
- d) None of the above

7. is the process that allows selective hiding of data and function in a class.

- a) Class
- b) Inheritance
- c) Encapsulation
- d) Polymorphism

8. In this phase the software is checks for bugs and verifies its performance before delivery of users.

- a) Requirement Collection
- b) Design
- c) Development
- d) Testing

9. Which is Cloud Computing?

- a) Cloud Computing means providing services like storage, servers, database, networking etc.
- b) Cloud Computing means storing data in a database
- c) Cloud Computing is a tool used to create an application
- d) None of the mentioned

Group 'B'

Give short answer to the following questions.

[5×5=25]

1. What is database security? Why is it important? Describe different methods to protect database of an organization.

OR

Differentiate between Centralized and Distributed Database System.

2. Write a program to find days of the week using switch case statement in JavaScript.

OR

Explain the datatype used in PHP.

3. Describe any five features of OOPs.
4. Explain any two software development model with their merits and demerits.
5. In your opinion what has been the greatest breakthrough in computer technology in the recent year and why?

Group 'C'

Give long answer to the following question.

[2×8=16]

6. What is transmission media? Explain the different types of transmission media used in computer network.
7. Write a program to store roll_no, name, class and section of 10 students in a data file and display each record on the screen in an appropriate format.

OR

What is recursive function? Write a program to display the factorial of any numbers using recursive function.

*****Best of Luck*****
