

Second Terminal Examination - 2079

Class : XII

Subject: Computer Science (4281)

Full Marks: 50

Time: 2 hrs.

Set - A

Pass Marks: 20

Candidates are required to give their answers in their own words as far as practicable. The figures in the margin indicate full marks.

Group 'A'

Multiple choice Questions

[9 × 1 = 9]

Rewrite the best alternative of each question in your answer sheet.

- Which of the following is generally used for performing tasks like creating the structure of the relations?
a) DML (Data Manipulation Language)
b) DCL (Data Control Language)
c) Relational Schema
d) DDL (Data Definition Language)
- Which of the following SQL statement is used to DELETE rows from a database table?
a) DELETE b) REMOVE c) DROP d) CLEAR
- When you are on the telephone, you might hear someone else's conversation due to
a) Attenuation b) Cross Connection
c) Noise d) Crosstalk
- What IP address class allocates 8 bits for the host identification part?
a) Class A b) Class B c) Class C d) Class D
- What is the output of C program with pointers?

```
int main()
{
    int a = 20;
    //a memory location = 1234
    printf("%d %d %d", a, &a, *(&a));
    return 0;
}
```

- a) 20 20 20
c) 20 1234 20

- b) 20 1234 1234
d) 20 20 1234

6. Which one of the following is correct syntax for opening file?
 - a) `file_pointer=open("file_name", "mode");`
 - b) `file_pointer=fopen("format specifier", "mode");`
 - c) `file_pointer=fopen("file_name","mode");`
 - d) `file_pointer=fopen(fp, "format specifier", "mode");`
7. In OOP approach is used in program design.
 - a) Top down
 - b) Bottom Up
 - c) Both a and b
 - d) None of the above
8. Which of following is the discovering requirement from a user in the requirement collection process?
 - a) Feasibility Study
 - b) Requirement Elicitation
 - c) Requirement Specification
 - d) Requirement Validation
9. Which of these is the correct order of the SDLC?
 - a) Analysis, Design, Coding, Testing, Implementation
 - b) Analysis, Design, Testing, Implementation, Coding
 - c) Implementation, Coding, Analysis, Design, Testing
 - d) Analysis, Design, Testing, Coding, Implementation

Group 'B'

Give short answer to the following questions.

[5×5=25]

1. What is normalization? Explain 1NF and 2NF with example.
2. Differentiate between IPV4 and IPV6.
3. WAP to demonstrate pass by value and pass by reference program using function.
4. Explain any five features of object-oriented programming.
5. Explain the system implementation and system maintenance of SDLC phases.

Group 'C'

Give long answer to the following question.

[2×8=16]

6. Explain the Client-Server and Peer to Peer network architecture with their advantages and disadvantages.
7. WAP to input records of five different students in structure having member name, roll and marks and display them.

OR

WAP to store book_id, book_name and book_price of 10 books to a data file. Then display the same record from the data file.

*****Best of Luck*****
