

First Terminal Examination – 2082

Class : XI

Subject: C. English (0031)

Full Marks: 75

Time: 3 hrs.

SET A

Pass Marks: 30

Candidates are required to give their answers in their own words as far as practicable. The figures in the margin indicate full marks.

1. Read the passage given below and answer the questions that follow.

The medical world appears to be divided on the effects of the sun upon the human body. From statements like, “There is no known relationship between a tan and health” to “perhaps sun-tanned skin absorbs the ultraviolet rays and converts them into helpful energy”, there are some things which are still the topic of research. Doctors agree on one of the benefits of the sun – vitamin D. It is well known that vitamin D is acquired from the direct rays of the sun – an entirely separate miracle from sun tanning. The sun’s ultraviolet rays **penetrate** only a tiny amount into the human skin, but in the process, they irradiate an element in the skin called **ergosterol**, which is a substance that stores up reserves of vitamin D received from the sun. This is both healthy and beneficial for human skin.

All around the Western World, people have developed an obsession with the sun. In many Western countries, a suntan has become the **trademark** of a healthy, active, outdoor person. The basic reddish hue just beneath the surface of our skin is the outward reflection of the millions of red corpuscles flowing through tiny blood vessels. This is most noticeable in the pure skin of a baby which can change in a moment from porcelain white (with anger or a switch in temperature) to crimson. In Caucasians, this colouring is somewhat hidden by an acquired layer of sun-made pigment, which varies in tone according to the complexion and occupation of the individual. Locale plays a big part in the effectiveness of the suntan. Mountain tops and beaches are **nonpareil** sun spas because they receive far purer sunlight than the rest of the land. Urban areas with their smoke and smog act as a filter removing all the healthy properties of the sun.

The sun has long been called nature’s greatest health giver and healer and has played a chief role at health resorts ever since August Rollier, the Swiss father of **heliotherapy**, opened his first high-Alps sanatorium in 1903. Dr. W. W. Coblentz suggests that the sun cure is a major factor in the treatment of at least 23 skin diseases, ranging from acne and eczema to ulcers and wounds. Another specialist, Dr. Richard Kovacs writes, “Sun treatment is often helpful to persons suffering from general debility – repeated colds, respiratory diseases, influenza and

the like". After a long winter, the return to the sun writes Dr. Leonard Dodds, the British sunlight scholar, "is a general stimulus to the body, more potent if applied after a period when it has been lacking which gradually loses its effect if exposure is over prolonged, even when not excessive".

Over many years of study, **dermatologists** have proven that excessive exposure to sunlight for years is responsible for a large proportion of skin cancer amongst the population. Those with the greatest chance of doing permanent damage to their skin are the year-round outdoor workers – 90% of which occurs on the heavily exposed hands and face. The first line of defense against permanent sun damage is the skin's own natural fatty matter and sweat, which combine to form an oily acid surface shield against the ultraviolet rays. Over the years, women have shown far greater wisdom in the care of their skin than men. Since the ladies of ancient Egypt first began to apply the fat of the so-called sacred temple cats to their faces, women have been tireless in **waging** this battle against damage to the skin from the sun.

A. Mark the statements True, False, or Not Given. [5×1=5]

TRUE If the statement agrees with the information given in the text.

FALSE If the statement contradicts the information given in the text.

NOT GIVEN If there is no information in the text.

- a. Vitamin D can only be acquired from sun tanning.
- b. A suntan has become the trademark of a healthy, active, outdoor person in the USA.
- c. Urban pollution reduces the baneful effects of sunlight.
- d. August Rollier was the pioneer of heliotherapy in Switzerland.
- e. Dr. Leonard Dodds believed that sun exposure always remains effective no matter how long it continues.

B. Complete the following sentences using the words highlighted in the text. Two of these words are not necessary. [5×1=5]

- a. According to, prolonged exposure to the sun causes skin cancer.
- b. Dark skin is a of a healthy person in some countries.
- c. The sun's ultraviolet rays transform in the skin into vitamin D.
- d. Women have been proactive in war against skin damage.
- e. Some places are sun spas due to the quality of sun rays they receive.

C. Give short answers to the following questions in ONE SENTENCE each. [5×1=5]

- a. What is one widely accepted benefit of sunlight?
- b. How does the skin show colour changes in babies?
- c. According to Dr. Richard Kovacs, which conditions can sunlight help relieve?

- d. Which parts of the body are mostly affected by long-term sun exposure?
- e. What natural shield does the human body produce against ultraviolet rays?

2. Write short answers to the following questions in about 75 words each. **[5×2 = 10]**

- a. How do you describe the garden of The Selfish Giant? (*The Selfish Giant*)
- b. How different is oral tradition from literary tradition? (*Sharing Tradition*)
- c. Discuss dramatic irony in relation to the text *Trifles*.
- d. Why has the speaker come to the Earth? (*Corona Says*)
- e. According to Frank LaPena, what is the importance of oral tradition? To what extent do you agree with his opinion and why? (*Sharing Tradition*)

3. Write long answers to the following questions in about 150 words each. **[2×5 = 10]**

- a. The story makes use of personification as one of the main figures of speech. Cite three examples of personification as one of the main figures of speech. What is the significance of the seasons personified in the story? (*The Selfish Giant*)
- b. Explain the following:
 Sure,
 I will depart one day.
 But remember
 There're many others like me.
 They'll come too.
 If you don't get rid of your inflated ego,
 You'll be back to your cave time
 That you endured
 Long, L o n g, L o n g, ago. (*Corona Says*)

4. Write a couple of paragraphs on 'Cyber bullying' in about 150 words including title, topic sentences, and concluding sentences. **[7]**

5. Write an email to your friend in around 180 words explaining the interesting class that you have had. Mention what particularly happened on that day and how the teacher made it interesting. **[8]**

6. Education for women is not just a personal asset-it's a powerful force for societal transformation. Write an essay on 'The Importance of Education' in about 300 words. **[10]**

7. Do as directed and rewrite the sentences.

[10×1 = 10]

- a. John works very hard all the time. (*Identify the word class of the underlined word.*)
- b. We all are dealing with modernization, but actually not concerned about it. (*Underline the **noun** in this sentence.*)
- c. This is to inform you that it is not my problem. (*Underline the **determiner** in this sentence.*)
- d. Pritam doesn't get up before seven. (*Interpose '**usually**' in the right position.*)
- e. She goes to the cinema. (**seldom**) (*Put the frequency adverb in the appropriate place and rewrite the sentence.*)
- f. We were tired all. (*Rewrite the sentence placing the adverb in the right place.*)
- g. NASA launched a satellite **in/into/on/onto** space. (*Complete the sentence with the correct preposition from the brackets.*)
- h. The soldier walked.....the rope. (*Use the appropriate preposition in the blank.*)
- i. He..... (**be**) too busy in the office yesterday. (*Use the correct form of the verb in the brackets to complete the sentence.*)
- j. I used to (**wake/woke/woken**) up at 6 o'clock in the morning. (*Choose the correct option from the brackets to complete the sentence.*)

8. Choose and copy the correct option.

[5×1 = 5]

- a. The abbreviation **C** in the dictionary means:
i. Conjunction ii. Country iii. Counter iv. Countable
- b. The correct headwords for guide words 'Nitrogen-Nitrosyl':
i. Nitrous ii. Nitration iii. Nitpick iv. Nitrophenol
- c. Which of the following is not an adverb?
i. Lively ii. Nicely iii. Slowly iv. Finally
- d. Which of the following is not the correct use of prepositional verb-
"bring up"?
i. She was partly brought up by her maternal grandparents.
ii. She tried repeatedly to bring up the subject of money.
iii. They had to bring up the child as he had no parents.
iv. She brought up the book on the table.
- e. The word 'undulating' means:
i. Clear ii. Vision iii. Tired iv. Wavy
